

Shakeer Ahmad

Cloud & DevOps Engineer

ahmad.shakeer.md@gmail.com — Hyderabad — <https://linkedin.com/in/shakeerahmad05> — <https://github.com/Sparkeeer>

Profile

Cloud and DevOps-focused IT Engineer with hands-on experience managing Microsoft 365 environments, performing cross-tenant migrations, and supporting enterprise cloud infrastructure. Skilled in AWS, CI/CD pipelines, containerization, and cloud networking fundamentals. Experienced in identity and access management, troubleshooting production issues, and automating deployments. Passionate about building reliable cloud systems and improving deployment efficiency through DevOps practices.

Technical Skills

Cloud: AWS (EC2, S3, VPC, IAM, CloudFront, RDS), Azure Fundamentals

Containers: Docker

CI/CD: GitHub Actions

Infrastructure as Code: Terraform

Scripting: Bash

Version Control: Git, GitHub

Operating Systems: Linux (Ubuntu)

Networking: VPC, Subnets, NAT, Load Balancers, DNS & TLS, TCP/IP basics

Scripting and Automation: Bash/Python, automation scripts

Incident Management: RCA documentation, postmortems, on-call ownership, reducing alert fatigue

Professional Experience

IT Engineer

Princeton IT Services, Gudivada

Oct 2025 – Present

- Provide L1/L2 technical support for Windows and Linux environments, resolving 20+ incidents weekly across enterprise systems.
- Administer Microsoft 365 tenants, including user provisioning, license management, mailbox configuration, and access control.
- Assist in cross-tenant migration planning and execution, ensuring minimal downtime and accurate data transfer.
- Troubleshoot networking and cloud service issues related to DNS, authentication, and connectivity.
- Document troubleshooting procedures and operational workflows to improve internal knowledge sharing.

Technical Projects

Automated Portfolio Infrastructure & CI/CD Pipeline [GitHub]

Technologies: AWS S3, AWS CloudFront, AWS ACM, Cloudflare, Spaceship, GitHub Actions, Git, YAML, IAM

- Designed and deployed a production-grade static portfolio website using AWS S3 and CloudFront CDN with custom domain integration.
- Implemented secure access using Origin Access Control (OAC) and HTTPS via AWS Certificate Manager (ACM).
- Built a CI/CD pipeline using GitHub Actions to automate deployments by syncing repository changes to S3.
- Configured DNS, domain routing, and redirects using Cloudflare and Spaceship.
- Secured the deployment workflow using GitHub Secrets and IAM least-privilege policies.
- Troubleshoot and resolved real-world issues related to DNS propagation, SSL validation, and access permissions.

Cross-Tenant Microsoft 365 Consolidation

Technologies: AvePoint Fly, Microsoft 365 Admin Center, Exchange Online, DNS

- Participating in the consolidation of **7 Microsoft 365 US tenants into a single India-based tenant**.
- Executing staged cross-tenant mailbox migrations with pre-synchronization and controlled production cutover.
- Managing DNS configuration, including MX, SPF, and DKIM records, during domain transfer.
- Recreating users, groups, and license mappings while maintaining permission alignment.
- Performing mailbox, OneDrive, and SharePoint migrations with delta synchronization.
- Conducting post-migration validation to ensure data integrity and service continuity.

Google Workspace to Microsoft 365 Migration

Technologies: Exchange Online, Microsoft Migration Tools, DNS

- Migrated **40 users** from Google Workspace to Microsoft 365.
- Transferred Gmail, Contacts, and Calendar data into Exchange Online.
- Managed MX record transition and DNS updates to ensure uninterrupted email delivery.
- Assisted users in migrating files from Google Drive to OneDrive and SharePoint.
- Performed post-migration validation and issue resolution.

Education

R.V.R & J.C College of Engineering, Guntur

2020 – 2024

Bachelor of Technology – Information Technology

Overall Percentage: 81.14
