

Shakeer Ahmad

Microsoft 365 Engineer

ahmad.shakeer.md@gmail.com • Hyderabad, India
shakeer.space • linkedin.com/in/shakeerahmad05 • github.com/Sparkeeer

Profile

Microsoft 365 Engineer with 1+ year of experience supporting Microsoft 365 environments across identity, messaging, endpoint administration, migrations, and automation. Hands-on experience with Microsoft Entra ID, Exchange Online, Intune, Teams, SharePoint, OneDrive, Active Directory, DNS, Power Automate, and Copilot Studio. Experienced in incident troubleshooting, tenant migrations, workflow automation, SLA-driven support, root cause analysis, and technical documentation. Microsoft Certified: Azure Fundamentals (AZ-900), currently building hands-on Azure skills toward Azure Administrator and Cloud Engineering roles.

Technical Skills

Microsoft 365: Exchange Online, Microsoft 365 Admin Center, Outlook, Teams, SharePoint Online, OneDrive, Licensing, Mailbox Administration

Identity & Security: Microsoft Entra ID, Active Directory, Conditional Access, MFA, RBAC, Security Groups, Group Policy, Access Management, User Provisioning

Endpoint Management: Microsoft Intune, Device Management, Compliance Policies, Application Management, Endpoint Configuration, Endpoint Troubleshooting

Migrations & DNS: Cross-Tenant Migrations, Google Workspace to Microsoft 365, Exchange Online Migration, SharePoint, OneDrive, MX, SPF, DKIM, CNAME, DNS Cutovers

Automation & AI: Power Automate, PowerShell, Copilot Studio, GitHub Actions, Python, Bash, Workflow Automation, AI-Powered Self-Service

Cloud: Microsoft Azure, Azure Virtual Machines, Availability Sets, Virtual Networking, App Service, AWS S3, CloudFront, IAM, Route 53, ACM

Networking & Infrastructure: TCP/IP, DNS, DHCP, VPN, LAN, Wi-Fi, Subnets, Routing Fundamentals, Windows Server, Virtualization Fundamentals

Operations: L1/L2 Troubleshooting, Incident Management, Alert Triage, SLA Management, Root Cause Analysis, Runbooks, SOPs, Knowledge Base Documentation

Professional Experience

Microsoft 365 Engineer Oct 2025 – Present
Princeton IT Services, Gudivada, Andhra Pradesh

- Provide **L1/L2 Microsoft 365 and infrastructure support** in a 24x7 environment, troubleshooting identity, messaging, endpoint, networking, authentication, and access-related incidents.
- Administer **Microsoft Entra ID** including user accounts, MFA, Conditional Access, security groups, access management, and identity-related troubleshooting.
- Administer **Exchange Online and Microsoft 365 services** for 50+ users, including mailboxes, licensing, Outlook, Teams, OneDrive, SharePoint, and service access.
- Manage **Active Directory** including user provisioning, security groups, organizational units, Group Policy, password management, and access control.
- Perform **Microsoft Intune administration** including device configuration, compliance policies, application management, endpoint policies, and device troubleshooting.
- Support **Microsoft 365 tenant migrations**, including Exchange Online, OneDrive, SharePoint, DNS configuration, user provisioning, licensing, and post-migration validation.
- Troubleshoot **DNS, DHCP, VPN, TCP/IP, Wi-Fi, connectivity, authentication, and endpoint issues** while working within SLA requirements.
- Design and administer **Microsoft 365 automation solutions** using Power Automate, SharePoint, Teams, Exchange Online, and Copilot Studio to reduce repetitive operational work.

- Perform **root cause analysis** for recurring incidents and document troubleshooting procedures, corrective actions, SOPs, runbooks, and knowledge base articles.
- Monitor and respond to **system and service alerts**, perform initial diagnostics and corrective actions, and escalate complex incidents with relevant technical information.
- Communicate directly with users and stakeholders throughout incident resolution, providing troubleshooting guidance, status updates, resolution details, and escalation support.

Certifications

Microsoft Certified: Azure Fundamentals (AZ-900) June 2026
Score: 826 / 1000 — Verify Credential

Microsoft Certified: Azure Administrator Associate (AZ-104) In Progress
Identity, governance, storage, compute, virtual networking, monitoring, and backup in Azure.

Technical Projects

Princeton Engage – Employee Engagement Platform & Greetings Bot Portfolio

Technologies: Microsoft Copilot Studio, Power Automate, SharePoint Online, Microsoft Teams, Exchange Online, Microsoft 365, HTML

- Designed and implemented an **employee engagement platform** using Microsoft 365 to automate employee birthdays, work anniversaries, and years-of-service recognition.
- Built a centralized **SharePoint Employee Directory** containing employee name, email, department, date of birth, date of joining, and active status as the source of truth for recognition workflows.
- Implemented a **Recognition History repository** in SharePoint to track recognition events and maintain historical records for future reporting and analytics.
- Built automated **Power Automate workflows** that run daily, identify employee milestones, record recognition events, publish Teams announcements, and send personalized email notifications.
- Configured an **Exchange Online shared mailbox** as the centralized Greetings Bot sender for consistent employee recognition communications.
- Designed responsive **branded HTML email templates** for birthday and work-anniversary communications with employee personalization and Outlook/mobile compatibility.
- Integrated **Microsoft Teams** to automatically publish birthday and work-anniversary announcements within the Employee Engagement channel.
- Developed and published a **Microsoft Copilot Studio agent** accessible through Teams that retrieves employee milestone information and generates professional recognition messages.
- Implemented the platform as a reusable foundation for future capabilities including duplicate-recognition prevention, new-employee welcome automation, Power BI reporting, monthly recognition summaries, and additional bot functionality.

Mail-to-Ticket Automation System Portfolio

Technologies: Dynamics 365 Customer Service, Power Automate, Exchange Online, Microsoft 365

- Built an automated workflow that converts incoming support emails into **Dynamics 365 Customer Service cases**.
- Automated case creation, email threading, queue routing, acknowledgements, and SLA tracking using **Power Automate**.
- Reduced repetitive manual ticket-processing work and improved consistency of support case handling.

Cross-Tenant Microsoft 365 Migrations Portfolio

Technologies: Microsoft 365, Exchange Online, SharePoint, OneDrive, DNS, AvePoint Fly

- Supported **3+ Microsoft 365 tenant migrations** involving Exchange Online, OneDrive, and SharePoint data.
- Performed staged migrations with pre-sync, controlled cutovers, delta synchronization, and post-migration validation.
- Configured and validated **MX, SPF, DKIM, and DNS records** during domain transitions.

- Provisioned users, groups, licenses, and access permissions while validating Microsoft 365 services after migration.

Google Workspace to Microsoft 365 Migration

Technologies: Google Workspace, Microsoft 365, Exchange Online, OneDrive, SharePoint, DNS

- Supported migration of **40 users** from Google Workspace to Microsoft 365, including mail, calendar, contacts, and files.
- Migrated Gmail data into Exchange Online and Google Drive content into OneDrive and SharePoint.
- Planned DNS and MX transitions to maintain email delivery during the migration cutover.

Cloud Portfolio – AWS CI/CD Deployment

GitHub

Technologies: AWS S3, CloudFront, IAM, ACM, Route 53, GitHub Actions, Bash

- Deployed a static portfolio website using **Amazon S3 and CloudFront** with custom domain routing and HTTPS.
- Configured **CloudFront Origin Access Control and IAM permissions** to restrict direct access to the storage bucket.
- Built a **GitHub Actions CI/CD pipeline** that automatically deploys website changes from source control.
- Configured DNS, SSL/TLS, S3 permissions, CloudFront, and deployment automation end to end.

Education

R.V.R. & J.C. College of Engineering, Guntur

2020 – 2024

Bachelor of Technology – Information Technology

Overall Percentage: 81.14%

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Computer Networks, Database Management Systems, Software Testing, Artificial Intelligence and Machine Learning.
